Happy Holidays
The Technology & Manufacturing Association (TMA) was founded in 1925 by eight small manufacturing companies who believed they could better themselves by associating with one another. Through the years, members established programs and services that would help their businesses grow and prosper, train their employees, and provide medical and retirement benefits. As a result of these efforts, TMA has grown into a 1,000 member not-for-profit organization of precision manufacturing and supplier companies in the greater Chicago area.

TMA is governed by a Board of Directors, composed of executives from member firms. A full-time professional staff works closely with the Board and its committees and trust.

As a leading voice in an evolving manufacturing industry TMA cultivates and strengthens our members by providing them programs and services in order to thrive as individuals, companies, and as a business community. TMA is the leading voice for manufacturing and a major contributor to economic growth and opportunity.
Dear Members,

After lengthy discussion by both the TMA Board of Directors and TMA Staff we have decided to try a new approach to TMA’s 90th Annual Meeting. Because we think it is important that all Regular Manufacturing Members have access to our Officer’s reports, our audited statements, and our newly revised TMA Bylaws, we will be holding the 90th Annual Business Meeting the afternoon of Thursday, March 3 at our new TMA location in Schaumburg.

We hope to engage all of the nearly 800 Manufacturing Members of TMA and invite them to attend this meeting. We will also be providing - and soliciting - proxies from members who cannot attend in person. This 90th Annual Business Meeting will be open to all, at no cost. Refreshments and tours of our new facility will be available to attendees.

Two days later on Saturday, March 5, we will hold our 90th Annual Meeting Celebration Dinner at the Sofitel Chicago Watertower. At the celebration we will be recognizing the Winzler Award Winner and the winner of the Rose Mottl Award.

We will be providing additional information about both the 90th Annual Business Meeting and the 90th Annual Meeting Celebration Dinner in the coming weeks.

Congratulations to all TMA members, old and new, for 90 years of service to manufacturing.

Steve Rauschenberger
When you drive safely from one place to another without problems with your car’s wheels, you’ve personally experienced the value of induction heat treating – whether you know it or not.

“Every wheel on every car in the world has induction-hardened bearing races,” Dave Haimbaugh, CEO of Induction Heat Treating Corporation told TMA during a recent visit. “Every wheel hub that the wheel is attached to, those bearing races are induction-hardened.”

That’s the kind of work Haimbaugh and the near 60 members of the IHT team do everyday inside the walls of their 35,000 square foot building in Crystal Lake, Illinois.

IHT offers a variety of services, including induction hardening, case hardening, tempering, annealing, and brazing, as well as shrink fitting. They also make or repair coils and tooling.

“I’m proud of what we do here. We run a lot of work in this building and we rarely have anything come back,” he said. “Our quality control department is the best around. If an order doesn’t meet specifications, it doesn’t go out the door.”

Last year, IHT ran 10,000 orders and had a mere five return or repair. IHT is a busy shop that runs around the clock and is in a constant state of tear down and set up.

While IHT does work for several industries, much of what they do is for the automotive industry – and that’s a sector that is keeping IHT particularly busy.

“Automotive is extremely strong right now,” Haimbaugh said. “I believe in the last quarter, more cars were sold than any quarter since 2005.”

Haimbaugh assumed the role of IHT’s CEO when his older brothers Kurt and Richard retired. The three of them assumed the company leadership when their father – who founded the company in 1946 – retired in 1978.

At that time, the youngest Haimbaugh returned to IHT. He remembers coming to work with his dad when he was a little kid.

“I remember being six years old, being led into the back of the plant and being shown a basket of small gears,” he said. “My dad said ‘Here’s your game – put these gears on these nails until you can’t stand them up any higher.’

Haimbaugh said that even being so young, he figured out what he was doing wasn’t a game – he was helping the family business.

Since that time, Haimbaugh says that he’s worked in every
one of the company’s departments, and is familiar with the work each one does.

Last December, the company leadership started including IHT’s whole team in planning and making them aware of what it takes to keep a company productive and profitable.

“We run an open book model, an idea introduced by TMA member Tasty Catering,” Haimbaugh said. “It’s called the ‘Great Game of Business.’ We want our people to know what it takes to run a business. They’re finding out that sometimes it isn’t so easy.”

They began setting aside a short period of time every Wednesday morning and afternoon for the company employees to gather in a huddle and review on a large white board the income statement and the balance sheet. They discuss how much projects are costing and whether they’re reaching expectations.

Like other manufacturers, one of IHT’s biggest challenges is keeping costs down.

“Controlling costs is a real challenge. Contrary to printed reports our government makes, we don’t have a Swiss bank account,” he said. “The cushion is very thin.”

IHT does a lot of their own in-house employee training, and they work hard to keep equipment producing – two other areas that can make company owners lose sleep.

During the 2008-2009 recession, like a majority of fellow manufacturers, IHT was forced to layoff 40 percent of their team. But because of prudent decisions, they survived and are now busier than ever.

“I just want people to know that we’re here,” Haimbaugh said. “We’ve been told that we should get the word out about what we offer.”

When he’s not at IHT, Haimbaugh has a real passion about outdoor sports – especially winter sports.

He has two Huskies that he’s trained to pull him on cross-country skis – a sport called ski-jouring. When snow is on the ground, Haimbaugh can often be found at McHenry County’s Glacial Park, giving his dogs a workout.

In the fall, Haimbaugh makes cider from his 50-tree apple orchard.

In the summer, he enjoys taking rides on his British Triumph through Wisconsin and northwestern Illinois. The day TMA visited, Haimbaugh’s shiny cranberry red bike was parked in front.

“I especially like the British because they gave me three things I adore – the Beatles, motorcycles and my wife Lynda,” he said.

Haimbaugh said that he expects the leadership team at IHT to keep the company going strong when he retires – but that won’t be very soon.

“I’ve still got a 20 year old in college,” he said.

IHT Corporation is located in Crystal Lake, Illinois or on the web at: www.ihtcorp.com
The workers comp system is broken in Illinois and is in desperate need of reform — something the politically connected resists.

"It's a perverse system. It rewards all the wrong behaviors in the state of Illinois. Other states do a much better job," he said.

One alternative is moving to a “no fault” workers injury system. In that system an injured employee would be encouraged to get well, and workers comp system and major medical companies then battle out how the liability is divided.

Illinois could have a system similar to how auto insurance works, Rauschenberger said, “except you’d have 700 unemployed workers comp attorneys who work in the Thompson Center and make a living perverting and pushing injured workers into bankruptcy. This is not shaving a dime or a quarter. This is about injured workers not being treated fairly by a system that enriches politically connected lawyers.”

Rauschenberger said manufacturers are looking for a few important things from their lawmakers: a stable tax system, a government that’s not corrupt, fixed roads so their trucks can make deliveries and a state that’s not a laughingstock.

The former state senator was chairman of the Senate Appropriations Committee during the years when his party was in the majority. He started serving as TMA’s president in 2014.●
The Rose Mottl Leadership in Manufacturing Award recognizes women who have worked to advance the manufacturing industry and whose efforts serve as an inspiration to current and future generations of women.

If you know someone like this, please recognize her by completing the nomination form below. Submit by January 15, 2016.

**NOMINATOR DETAILS**

Full Name: ___________________________ Email: ___________________________
Phone: ___________________________ How do you know the nominee?: ___________________________

**NOMINEE DETAILS**

Full Name: ___________________________ Employer: ___________________________
Email: ___________________________ Phone: ___________________________ Have you notified nominee?: Yes  No

REQUIRED STATEMENTS: Please provide a detailed description of the nominee’s contribution to manufacturing and how she has/will influence future generations of women. Please attach additional information where required. Supporting materials will not be returned.

Former President of TMA
Winzeler Award Winner 2014
Member of Christians in Manufacturing Committee
Vice Chairman of Supplier Network Committee
Served in the U.S. Marine Corps
TMA BOARD OF DIRECTORS NOMINATING COMMITTEE

TMA’s Board of Directors Nominating Committee will be meeting on January 12, 2016 at 2:30pm at the Technology & Manufacturing Association (TMA) located at 1651 Wilkening Road, Schaumburg, IL 60173.

This year’s committee members are Gregg Panek (Committee Chair), Bob Clifford, Mike Chester, Steve Kase, and Tim Merrigan.

Any member who wishes to submit names for consideration for service on the TMA Board of Directors may contact John Rauschenberger at jkr@tmaillinois.org or at 847.825.1120 ext. 1314.
